SUMMARY

Front-End Developer eager to craft captivating and responsive web experiences. Armed with expertise in React, JavaScript, TailwindCSS, I aim to bring innovation and excellence to a dynamic team.

SKILLS

Front End: React, JavaScript, Tailwind CSS , HTML5, CSS3 and familiar with Next.js.

Back End: Node.js, Express.js.

Database: MongoDB and familiar with Mongoose.

Authentication and Security: Firebase Auth, JWT (JSON Web Tokens).

Tools I use: Git, GitHub, Vercel and Netlify.

PROJECTS

FitTrack | https://fit-track-client.vercel.app | January 2024 -March 2024
- Led a team of six developers to create an resourceful fitness tracking app, featuring personalized workout plans and gamified challenges.
- Engineered a seamless user experience by implementing a customizable diet plan system.
- Integrated Zegocloud for video calls, allowing users to connect with trainers for real-time support.
- Personally developed the AI guidance system, empowering users with an interactive ChatGPT-powered personal trainer.
- Developed with: Next.js, Material UI, NextAuth, Express, Node.js, Mongoose, MongoDB.

Survytics | https://survytics-client.web.app | November 2023 - November 2023
- Implemented a user-friendly survey creation platform, allowing surveyors to effortlessly design surveys with yes/no questions.
- Developed a sophisticated analytics dashboard for surveyors, providing in-depth insights through charts and tables showcasing survey results.
- Incorporated interactive features such as liking and reporting surveys, enhancing user engagement and feedback collection.
- Developed with: React, TailwindCSS, Firebase, Mongoose, Express, Node, JWT web token.

Worktales | https://worktales-client.web.app | October 2023 - October 2023
- Engineered a comprehensive job marketplace allowing users to seamlessly list, update, and delete posted jobs.
- Implemented a bidirectional bidding system, enabling users to bid on listed jobs and job listers to review and accept or reject bids.
- Developed a bidding table where bidders can track and manage bids, including the status of each bid (accepted or rejected) by the job lister.
- Developed with: React, Firebase, Express, TailwindCSS, NodeJS, JWT token, MongoDB.

CERTIFICATIONS

Presentation and Public Speaking | 10 Minute School | 2024
- Learnt the skill of presenting a project in front of a client.
- Presented and led my team multiple time during the Bootcamp.

Complete Web Development | Programming Hero | 2023
- Learnt the fundamentals of JavaScript.
- Built multiple projects using latest frontend frameworks such as React and Next.js.

EDUCATION

Diploma in Computer Engineering | Chittagong Technical College | 3.21 | Chittagong | 2026
